

# 3 Things We Learned Designing Our First eVTOL Interior

---

# 3 Things We Learned Designing Our First eVTOL Interior

---

## Start with the Mission:

**4 Passengers**

**8 Minute Flight**

**5 Minute Turnaround Time**

**16 hours a day**

**365 days a year**

**This led to a completely different set of priorities**

# 3 Things We Learned Designing Our First eVTOL Interior

---

**Ease of Use > Comfort**

# 3 Things We Learned Designing Our First eVTOL Interior

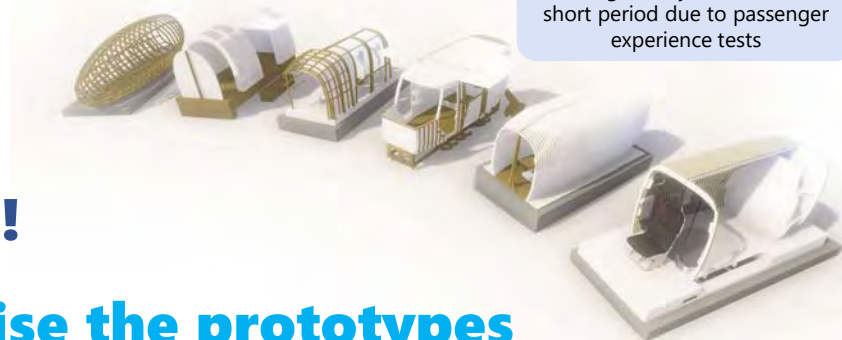

**Short flight means that ease of movement is critical**

**Hundreds of tests performed to optimize sizing, step-up, grab handles, and luggage loading. The end result was more like a car than an aircraft.**

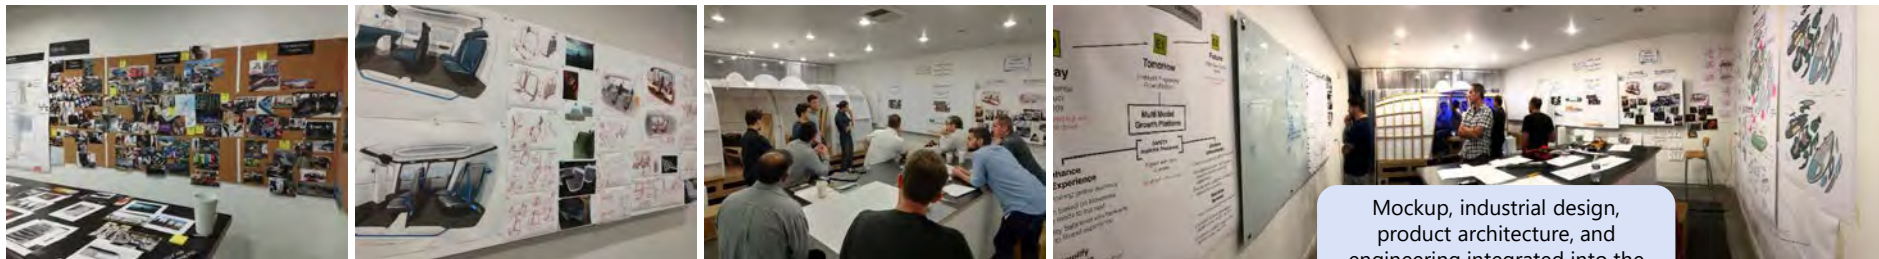

# 3 Things We Learned Designing Our First eVTOL Interior

Even the fuselage went through many revisions in a short period due to passenger experience tests

## Iterate!

## A system to quickly revise the prototypes after each test paid dividends

Mockup, industrial design, product architecture, and engineering integrated into the co-creation

# 3 Things We Learned Designing Our First eVTOL Interior

**The result is an interior that gets out of the way...  
so you can focus on your journey**

**POWERED  
BY TRUST**
